MARMORIN

Marmorin

Lime based finishing plaster, polished marble effect

Description

MARMORIN is a coloured plaster based on lime putty suitable for internal and external finishes of new and old architectural buildings with art and historical importance. The product presents excellent characteristics of colour stability high water vapour permeability, easy application, excellent fire resistance and a natural appearance, typical of old lime based plasters and coloured pigments.

Method of application

1. Apply one coat of MARMORIN with a stainless steel trowel.
2. Before the product is completely dry, apply a second coat of MARMORIN to achieve a smooth and compact surface. By working on the surface with a stainless steel trowel, it's possible to obtain a perfect polished, satin finish.

Consumption rate

0.9 - 1.2 kg/m²
